PROFESSIONAL SUMMARY

Software engineering-focused graduate with strong foundations in data structures, algorithms, and backend development. Experienced in building data-driven systems, optimizing performance, and translating ambiguous requirements into scalable solutions. Strong problem-solving ability with a focus on writing efficient, maintainable code.

TECHNICAL SKILLS

Languages: Python, Java, SQL
Core Computer Science: Data Structures, Algorithms, OOP, DBMS, Complexity Analysis
Backend Development: REST APIs, Spring Boot, Spring Data JPA
Databases: MySQL, PostgreSQL (Query Optimization, Indexing)
Tools: Git, GitHub, Linux, Ms Office, Docker

ENGINEERING PROJECTS

CivicCare – Emergency Support Platform Java | Spring Boot | Spring Data JPA | MySQL | REST APIs

- Built a backend-driven emergency support platform to streamline blood donation requests and emergency service coordination
- Exposed REST APIs for donor registration, blood request creation, and location/blood-group-based donor retrieval
- Implemented clean layered architecture (Controller–Service–Repository) using Spring Boot and Spring Data JPA for reliable data persistence
- Added structured API responses, input validation, and exception handling to ensure system reliability and maintainability

Safex – Mobile Password & File Manager Mobile Development | Encryption | Secure Storage

- Developed a mobile application providing secure vault functionality for passwords and sensitive files
- Implemented encrypted storage to protect user credentials and private documents from unauthorized access
- Designed an intuitive UI for organizing, retrieving, and managing passwords and files with strong access controls

Sales & Operations Data Analysis Python | Pandas | NumPy | Matplotlib | SQL

- Performed end-to-end exploratory data analysis on operational datasets to uncover trends, anomalies, and performance bottlenecks
- Used Pandas and NumPy for data cleaning, transformation, and aggregation; visualized insights with Matplotlib and Seaborn
- Wrote optimized SQL queries to extract and join large datasets, enabling faster reporting and data-driven decision-making
- Delivered actionable findings that informed process improvements and reduced operational inefficiencies

EXPERIENCE

Sutherland Global Services — Associate Intern Jan 2026 – Feb 2026
Chennai, India

- Analyzed operational datasets to identify inefficiencies, automated repetitive reporting tasks, and improved data accuracy
- Collaborated with cross-functional teams to translate business requirements into technical insights and resolved real-time operational issues

ACHIEVEMENTS & CERTIFICATIONS

- Solved 150+ Data Structures & Algorithms problems on LeetCode and HackerRank
- Earned SQL Certificate from HackerRank — demonstrated proficiency in complex queries, joins, aggregations, and query optimization
- Earned Python Certificate from HackerRank — demonstrated proficiency in Python programming, data manipulation, and problem solving

EDUCATION

SDHR Degree College — Bachelor of Computer Applications (BCA) | CGPA: 8.5 2023 – 2026
